

PIPELINE AND ENVIRONMENTAL COMPLIANCE & PERMITTING

CAMPOS EPC (CEPC) is a provider of regulatory compliance services both in the environmental and pipeline transportation fields.

CEPC has a team of compliance professionals experienced in site selection, due diligence and environmental permitting for a variety of project types including turnkey pipeline projects, fuel terminals and other liquid and gas related facilities.

CEPC staff includes individuals experienced in the development, implementation and auditing of liquid and gas pipeline Operations and Maintenance Manuals, Integrity Management Plans, Public Awareness Plans and other programs mandated by the 192 and 195 regulations and State agencies. Our staff has participated in numerous PHMSA and state audits and has conducted multiple internal audits of programs for our clients to ensure regulatory compliance.

We have hands-on operations and consulting experience developing and implementing programs in accordance with industry regulations, standards and best practices.

Regulatory services we perform:

- Program compliance audits
- Documentation review and evaluation
- Evaluate results of audits/inspections and make recommendations
- Annual compliance filings
- Preparation of responses and corrective actions as a result of internal and external audits
- Manual re-writes and/or evaluations
- Environmental and Natural Resources Permitting, including Federal, State, Tribal and Local Agencies
- Emergency Response Plans

CEPC works with its clients to evaluate all available data so that a true needs assessment can be performed.

Program and manual modifications are essential to meet/address changes with regards to the regulations and the Client. CEPC continuously reviews and works with its clients to maintain current and relevant programs. When conducting audits of programs, CEPC utilizes current audit protocols and the latest findings and issues from PHMSA/OPS and relevant state agencies.

Greenfield projects require many environmental surveys and permits prior to any construction taking place. CEPC has personnel experienced in evaluating proposed project sites and/or routes and can manage and coordinate all permitting activities. Environmental and Natural Resource permits are necessary for many projects, and CEPC will work diligently with the appropriate Agencies to acquire the permits in a timely manner.
